

(a) End of injection

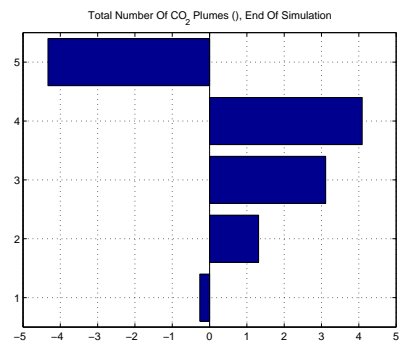

(b) End of simulation

Figure 12 Average pressure sensitivity to different geological features. In these pictures, the vertical axis shows the different geological features from bottom to top: 1-fault, 2-lobosity, 3-barrier, 4-aggradation and 5-progradation. Notice the different range in the horizontal axis at end of injection and end of simulation.

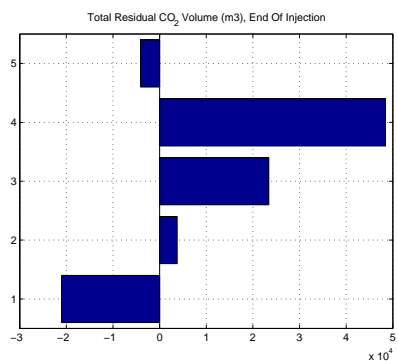

(a) End of injection

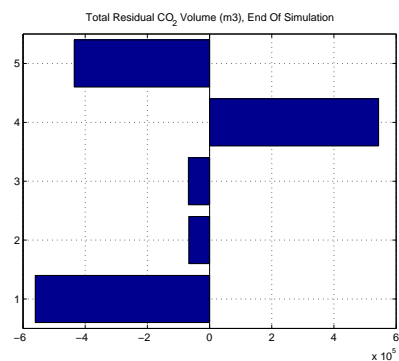

(b) End of simulation

Figure 13 CO₂ plume number sensitivity to different geological features. See Fig. 12 for the vertical axis explanation.

(a) End of injection

(b) End of simulation

Figure 14 Total residual CO₂ sensitivity to different geological features.
