

# Letter of thesis submission

---

This is a request for submitting the PhD Thesis 'Geological Storage of CO<sub>2</sub>: Sensitivity and Risk Analysis' by Meisam Ashraf to the faculty of Mathematics Department in Bergen University, Norway.

This is the second submission of the thesis. The first submission was rejected in February 2013, mainly due to the lack of quality in some parts of the report. The candidate, with constant support of his advisers, has done an extensive effort during several months after the refusal decision to fully address the comments mentioned by the thesis reviewers.

Attached to this letter are the following:

1. The final version of the revised thesis.
2. A report on the modifications to the dissertation.
